

A 2D shape with four straight sides of equal length and four right-angles.

A 2D shape with one curved edge. All points on the edge of this shape are the same distance from the centre.

A 2D shape with five straight sides of equal length and five angles of equal size.

A 2D shape with six straight sides of equal length and six angles of equal size.

A 2D shape with three straight sides of equal length and three angles of equal size.

A 2D shape with three straight sides and three angles. Two of the sides are the same length and two of the angles are the same size.

A 2D shape with three straight sides and three angles. One of the angles is a right-angle.

A 2D shape with four straight sides and four right-angles. One pair of sides is longer than the other.

A 2D shape with one curved edge. It is similar in appearance to the cross-section of an egg.

A 2D shape with four straight sides. One pair of sides is parallel with one side longer than the other.

A 2D shape with two pairs of adjacent, straight sides of equal length.

A 2D shape with eight straight sides of equal length and eight angles of equal size.

A 2D shape with three straight sides and three angles. All of the sides are different in length.

A 2D shape with eight straight sides and eight angles. The sides and angles are not all equal.

A 2D shape with five straight sides and five angles. The sides and angles are not all equal.

A 2D shape with six straight sides and six angles. The sides and angles are not all equal.

A 2D shape with nine straight sides of equal length and nine angles of equal size.

A 2D shape with two pairs of parallel, straight sides. All the sides are of equal length.

A 2D shape with seven straight sides of equal length and seven angles of equal size.

A 2D shape with ten straight sides of equal length and ten angles of equal size.

A 2D shape with seven straight sides and seven angles. The sides and angles are not all equal.

A 2D shape with nine straight sides and nine angles. The sides and angles are not all equal.

A 2D shape with ten straight sides and ten angles. The sides and angles are not all equal.

A 2D shape with one straight side and one curved side. It is half of a circle.
